SUMMARY

Head of Product, 9+ years in product leadership. The work spans B2B and B2C, marketplaces, consumer, and AI products, and runs deep in growth and monetization. Led a **15-person growth org on a ~$50M ARR product line** at Superhuman; first growth product hire at Dashlane and WeTransfer; Group PM at PrizePicks. Owns the **vision, strategy, and roadmap through to P&L outcomes** (acquisition, activation, retention, monetization) and stays hands-on with agents, prototyping, and code.

EXPERIENCE

Superhuman — New York, NY / San Francisco, CA **April 2026 – Present**
Head of Product, Growth — Superhuman Mail

- Lead a **15-person growth org (3 PMs)** across acquisition, activation, agentic growth, expansion, and monetization for a **~$50M ARR** product line.
- Built an agent-native growth motion that reached **20%+ of acquisition and multi-million-dollar annualized bookings** — agents delivering product value without conventional UI use.
- Rebuilt growth strategy around the leading behaviors that drive **73% retention and 93% activation**; randomized interventions on those behaviors lifted **seats-with-sends +4.7pp and completion +49%**.
- Rebuilt and extended **Get Me To Zero** for existing users and new users who had not completed onboarding, and expanded how users segment what gets to zero.
- Built a cross-suite growth model across Grammarly and Superhuman Mail; grew the **self-serve 5+ seat ARR base ~34%** and delivered a record multi-million-dollar expansion quarter.
- **Called a partial revert on a winning checkout experiment** — +0.57pp purchase success, +12.9% checkout-to-onboarding conversion — when downstream bookings per user deteriorated.
- Set the **growth operating model**: measurable hypotheses, decision velocity, business outcomes. Hired the expansion PM, converted a PMM into a PM role, and aligned stakeholder planning and metrics across six teams — Core, Lifecycle, Mobile, Billing, and Grammarly Growth.
- Part of financial planning for the whole Mail business; owned a **budget line covering three key results**.

PrizePicks — New York, NY / Atlanta, GA **Feb 2025 – Feb 2026**
Group Product Manager, Player Accounts Management (PAM)

- First Group PM for Player Accounts: led **4 PMs and 20+ cross-functional partners** across identity/KYC, payments, compliance, and responsible gaming. Owned headcount planning; promoted two of the four PMs.
- Drove **+25% registration-to-first-deposit, +5% KYC pass rate, and +12% LTV/CAC** through funnel experimentation and simplified onboarding and payment UX.
- Owned the strategy and roadmap for the account platform — the identity, payments, and compliance layer under DFS, free-to-play, and the **launch of prediction markets**.
- Modernized trust and compliance infrastructure while the funnel grew: **99.5% reconciliation accuracy, −40% chargebacks, −20% support volume**.

WeTransfer — New York, NY / Amsterdam, NL **Oct 2023 – Oct 2024**

Principal Product Manager / Director, Commerce (Growth & Monetization)

- First Growth PM; built and led the **Commerce function** — pricing, packaging, onboarding, checkout — across web and mobile with a 9-person cross-functional team.
- Delivered **+35% conversion and +20% ARR** through tier, onboarding, and checkout redesigns, partnering with Finance and Data Science on pricing elasticity and regional economics.
- Built the experimentation system that **tripled test throughput** and drove C-level monetization decisions, then saw it adopted beyond the commerce team.

Dashlane — New York, NY / Paris, FR **Dec 2019 – Oct 2023**

Senior Product Manager + Growth Lead, Growth & Monetization

- **First Growth Product hire**; scaled the org to 3 PMs, 2 designers, and 15+ engineers across B2C and B2B, and promoted all three PMs.
- Delivered **4–6% ARR growth per quarter (>$3M annually)** via pricing tests, paywall experiments, and onboarding optimization.
- Partnered with the C-suite to define the company's **PLG strategy and B2B go-to-market**, growth OKRs, and the dashboards used in quarterly planning.
- Launched dynamic pricing and paywall frameworks that increased **trial-to-paid conversion +22%** and reduced **voluntary churn −12%**.
- Also worked on core feature areas (**sharing, emergency contacts, platform**) alongside the growth portfolio.

Postmates (Uber) — Remote **Jan 2019 – Dec 2019**

Data Scientist, Product + Fulfillment + Growth

- Ran SQL/Python-backed growth and marketplace initiatives across conversion, retention, and fulfillment: customer conversion +25%, retention +30%, active users **2.1×**.
- Revamped fleet onboarding (+40% acquisition, +10pp retention) and launched fraud tooling that cut ~$100K in annual costs.

EY-Parthenon — Mexico City, Mexico **Jan 2018 – Jan 2019**

Mergers and Acquisitions Associate

- Built valuation, diligence, and financial models for fintech, telecom, and CPG transactions, including an **$860M** carve-out and a $150M LatAm fintech debt financing.

EDUCATION

Boston University — Questrom School of Business, Boston, MA **May 2017**

B.S. in Business Administration (BSBA), Finance and Strategy; coursework in Computer Science and Statistics
CFA Level II (DCF, LBO, carve-outs, M&A, 3-statement)

SKILLS

Product: Product strategy, growth strategy, product discovery, product analytics, segmentation, activation & onboarding, retention & lifecycle, monetization, pricing & packaging, experimentation / A/B testing, product-led growth, payments, user research

Technical: SQL, Python, AI agents, AI prototyping, Cursor

AI tools: Claude, ChatGPT, Perplexity, Granola, Notion AI, Superhuman AI

Fellowships & advising: SomosVC, OnDeck; Advisor — BuenTrip VC, Agora Accelerator

Languages & authorization: English, Spanish, French; U.S./Ecuador dual citizen; Mexico work authorization
